CARDIOVASCULAR HELP: Calmer and Happier

I have a condition that occasionally hinders my life with difficulty breathing, chest pains, irregular heartbeat and exhaustion. I usually don't have much trouble but this had been going on for weeks and I started to worry. With the first 2 capsules all my symptoms regulated within 30 minutes. My energy became normal and I have been feeling great ever since. I've been taking 2 capsules a day now for a month and am feeling calmer and happier than I have for years. Thanks StemTech! MS

DOCTOR'S EXPERIENCE: Improved Digestion, More Muscle Strength

In February 2003, I was diagnosed with Multiple Sclerosis. Being a holistic veterinarian, practicing acupuncture, chiropractic, herbal, nutraceutical, and nutritional medicine, I have chosen to work extensively with these modalities for myself. I am not taking any medications. And of all the supplements and healing work that I have done, I have never come across a product which has made as clear a difference for me as StemEnhance has.

Stem Enhance has greatly improved chronic digestive issues for me. It has significantly reduced levels of nerve related numbness and increased muscle strength so that I have been able to increase my weights by 5% at the gym for the first time in over a year. And it has really helped me with the chronic low level of depression that I experience daily. I noticed many of these changes within a week of starting StemEnhance at 2 pills once daily. I am now on 2 pills twice daily on my way to optimum health. Wishing you all abundant health. BE, DVM

Quality of Life, Sexual Stamina Dramatically Up

Hello, everyone I have a testimony to give. Here my results: **(A)** I got a clear mind for the first time ever in life. I see things more clear and can think peacefully so I am more aware of the present. **(B)** I used to have dreams but never too clear and not often. Now, somehow this is stimulating my brain and I am having dreams one after other when sleeping (of course) and I remember when I wake-up. **(C)** Before I used to get mad easily for almost no reason and grind my teeth. Lately, I am not feeling nervous and everything seems to be more understandable. **(D)** The most important thing ever happened to me. I am having sexual stamina, which is for the first time in my life helping me with making love. I am lasting all night and can keep up more and more, my desire for sex is greater and I am having feelings that I have never noticed before in my body. To better describe the feelings, when I am making love I kind of feel my partner better and want to enjoy more and more.

Conclusion: I am very satisfied with my self now, and the quality of life has improved 100%. Now, you don't have to take my word. I just want to share it with everyone. Good luck, AS

Chronic Fatigue Easing, Headaches Gone

I had chronic fatigue years ago and my energy levels never fully recovered. When I would exercise vigorously for ½ hour or more, I would get a headache and feel depleted for ½ day. Now since taking StemEnhance I no longer get the headaches and I am noticing a subtle increase in my energy levels each week. RA, DC

ANTI-INFLAMMATORY: Significant Knee Improvement

I have been taking StemEnhance for approximately 4 weeks. I noticed the effects of the product within the first week of using the product. I'm 46 and had ACL and meniscus surgery in 2000. I have had inflammation in the area around the knee on the repaired leg. Once I noticed the difference I realized that the product had a significant anti-inflammatory effect on me. I had started jogging daily with my wife and have not had any of the discomfort that I had experienced before taking the product. RL, CA

Passionate Jogger Outruns Pain, With Increased Mobility

I've been a very active mother of two young men for more than twenty years now and have had one great passion outside of raising those two boys. That passion is in my daily running and jogging. I have been averaging better than 20 miles a week for more than 20 years. I get a great deal of pleasure from this very basic activity and actually thought that I would have to give it up because I have no longer been able to sit in a car or on a chair for an extended period of time without a great deal of pain. I started taking StemEnhance when my husband brought it back from a presentation he had attended.

I took it for about a week and didn't realize at the time (at least not consciously) until my husband made a comment about it, but I had no pain at all while sitting at my desk for the better part of 4 hours. I have continued to take the product, I feel great before leaving and after returning from my daily running, my dog 'Dutch' is pretty much guaranteed to get a daily run for many years to come and I really believe that StemEnhance has contributed very much to my renewed ability to live an active life. DL, CA

This Has Been An Incredible Week

This is just a letter to tell about my experience taking StemEnhance.

Sat 12 Nov: My friend M. sold me a bottle.

Sun 13 Nov: I took 2 capsules (very happy to read that capsules are vegetarian.)

Mon 14 Nov: I took 2 capsules. The morning of this day I got out of bed noticing less stiffness in joints, and a more natural hip movement, more fluid, an arthritic joint on third finger of my right hand that often woke me with pain was less inflamed.

Tue 15 Nov: I took 2 capsules. This morning it was really obvious to me how my body was more centered. I was moving my hips like a much younger woman, and I was thinking young (rather hard to explain.) I felt less inclined to worry about things. Finger was not even hurting; I kept tugging on it in disbelief.

Wed 16 Nov: I took 2 capsules. Now I was so fired up about this that I was telling every one I came in contact with that would listen.

Thu 17 Nov: I took 2 capsules. Wow, I was just cranking; I worked a 10 hour day, and felt pleasantly tired from it, certainly not exhausted as I would have been normally.

Fri 18 Nov: I took only 1 capsule; wanted to see if I needed 2 or could manage on 1. Still very energized and felt this stuff might have an accumulative effect. No problem.

Sat 19 Nov: Took 0 capsules. Was a real energizer bunny all day, my husband was worried I was going to bounce off the walls!

Sun 20 Nov: Took 0 capsules. Buzzed around all morning, 3:30 pm I got out of my car, and felt the old me. So, 5:00 pm I took 1 capsule.

This has been an incredible week. I never took anything this powerful before. I have eaten superfoods of various kinds that have energized me, but they haven't had such a holistic effect. MC.

STIFFENING OF ARTERIES

Last year, I had tests completed that indicated a stiffening of the arteries of my heart. Of course, I was very upset as heart disease is the #1 killer of women in the US. I have heard about and read the clinical research that concluded that a higher stem cell count in the blood stream was directly related to a healthier heart, conversely, a lower stem cell count was directly related to a unhealthy heart. Since learning that StemEnhance helps the body support a higher number of stem cells from the bone marrow to the blood stream with every two capsules, I am now taking 2 capsule every 6 hours, without fail! This is fantastic news. RP, CA

BETTER SLEEP, MORE ENERGY & FOCUS, NO MORE LEG CRAMPS

I learned about StemEnhance in late October of 2005 and began taking two capsules once or twice a day. I should say that I take good care of myself with diet, exercise and nutrients. The first thing I noticed was that taking the capsules before bed helped me to sleep better. I experienced an increase in energy and focus during the day (no small feat for a 53 yr old). Now after 60 days of using StemEnhance, I realize that my chronic problem with extreme leg cramps has disappeared! I don't know how it happened and I don't care. I have tried everything and nothing has helped until now! Thanks to StemEnhance! KP, CA

LOWER BACK PAIN DISAPPEARS

I started taking Stem Enhance Oct 29th, 2005. I don't have any real health related problems. I'm 43 years old and know that over the years I haven't really taken as good of care of myself as I could have. I do have some bad lower back pain from time to time. Once in a while my lower back seems to go out. I wake up in the morning and it seems like my lower back slips out of alignment, where by looking in the mirror I can actually see I'm out of line.

This has been going on for about a year or so. I have to say since taking "StemEnhance" I noticed after about an hour the pain went away. I have not had any back pain or alignment problems to date. Once in awhile I do wake up with a little lower back stiffness but after walking around for a couple minuets it goes away. I feel better and better each and every day. I feel more energetic, I sleep better and get a lot more done throughout the day... Thank you "Stem Enhance". RK

WHATEVER MAKES THIS PRODUCT WORK, THANK YOU...

This testimonial is about my husband. He has been diagnosed with congestive heart failure, high blood pressure, enlarged heart, respiratory problems, kidneys that are shutting down, and the doctor told him he would be on dialysis within a year. He also has prostate problems, and his knees are bad (there is no cartilage in his left knee at all and he needs a knee replacement) but with his heart problems he would probably not survive the surgery. I was admitting him to the hospital at least twice a month for one thing or another. The last episode he had, I felt that if he survived for another year I would feel very lucky.

We started taking Stem Enhance six weeks ago: He said he feels better than he has in five or more years; his blood pressure has been very good, his prostate problems seem to have cleared up (at least they are not bothering him at this time.)

He went to the Doctor last Friday, and was told they see an "improvement in his kidneys." We were told they would not improve, but continue to get worse, maybe stabilize for a while, but dialysis for sure. He has not constantly been getting up at night to use the restroom. (One or two times against five to ten.) That makes for a better night's rest. For the first time in years, he can move his knee easily without pain. He even asks me to dance...

We just want to say "Whatever Makes This Product Work, THANK YOU STEMENHANCE." PKM

DIMINISHED PAIN

I am a diabetic with high blood pressure due to being overweight. I have had 2 major surgeries on my spine, 2 discs removed in lower spine and 2 discs removed in my neck. My neck has been very painful as the operation was

not entirely successful with extreme pain in left wrist and hand. Fingers feel like their being crushed. I started using StemEnhance on November first as I attended to pre-launch meeting. After the first few days I started feeling better with more energy. After a few weeks I noticed the pain was diminishing in my knees. Now the pain I have had in my wrist and hand is going away. GS, CA

AMAZING ANTI-INFLAMMATORY

Last September I was run over by a large Ford Excursion while I was sleeping under the starts in my sleeping bag. I woke up at 2:30 in the morning with a broken ankle and a severe crush wound. Four days later I found myself on the operating table getting a plate and screws put in my leg. Although I was walking within a few months and continued to snowboard and wakeboard, my healed injured ankle was significantly larger than my non-broken ankle. The swelling had taken most of the definition out of the top of my foot along with the inside of my ankle. I was introduced to the Stem Enhance product in early November and started taking 2 capsules per day. After 7 days I noticed a significant reduction in the swelling and the inside of my previously broken ankle looked just like the inside of my non-broken ankle. Needless to say I was rather amazed that such a product had such a dramatic healing effect on me in just 1 week. I inquired with some other people who have been taking the product only to find out Stem Enhance has some pretty amazing anti-inflammatory properties to it. Needless to say I'm very excited about the product and will continue to take it everyday before my other vitamins and minerals. RS, CA

EMPHYSEMA, ARTHRITIS, CLEARER MIND, SWOLLEN PROSTATE

Four years ago my lung specialist explained that my emphysema had progressed (past tense) to approximately 80% loss of lung capacity. He said I would be dead within five years. OUCH! I've always believed however that God would reach down and do a miracle before emphysema could take my life. Thank you, Jesus! "By Him all things were made"... I've been taking StemEnhance for about a month now and a few days ago I went for a half mile walk. First walk of any kind for over four years. I can even hear the difference when I cough.

Three years ago, I was doing my nebulizer treatment three times a day and used oxygen all night so I could breath. A month ago, before using StemEnhance, my nebulizer treatments had progressed to every two to three hours, day and night. My nebulizer treatment has now dropped to between three and four hours. I no longer have a swollen prostate. My arthritis is greatly improved. My thinking is much clearer and there's a noticeable difference in my memory. I feel and look years younger. I have much more energy and I'm feeling like this year I'll be able to do some things I've wanted to accomplish for years.

A month ago my average for getting up during the night was running from six on a good night to as high as 12 or more on a bad night. After a week on this product my average dropped to three. It's so wonderful to get a good night's sleep. PTL & TYJ!!! RM, AZ

BUSINESS TESTIMONIAL

PROFESSIONAL SETS EVERYTHING DOWN

I have been a professional marketer for more than 20 years. I've been blessed with a great deal of success. I looked at the StemTech Health Sciences program and the StemEnhance product with the intention of finding the bogey man in the product and the opportunity. I wasn't looking to make changes in my life. I guess the fact that I'm writing this testimonial will be indication enough as to what I found out.

I believe that timing is everything when your looking to make big differences in your life and the lives of others. I felt that the timing for this opportunity in this market with this product was so powerful that I immediately set everything else down that I was doing... I have not looked back at all with the decision to aggressively pursue the marketing of what I feel is the 'most logical next step in the evolution of healthy and wealth-full living'. RL, CA
