AMWater Actify
Water Treatment System

Technical Data Sheet

Product Specifications

- Dimension: 265 x 140 x 373mm
- Weight: Approx. 10lbs (4.5Kg)
- Produces: Alkaline, Acidic & Purified Water
- Product Classification: Ionized Water Generator
- Input Voltage: AC220V 60Hz (Voltage and Hz to be Changeable as per user's requirement)
- Input Electricity (Power Consumption): 0.4A(80W)
- Applicable Water Inflow Pressure Range: 0.7 ~ 5 Kgf/cm²
- Applicable Water Temperature Range: 5 ~ 30 C
- Unit Operation Means: Tap water open and close

Description

The eOmega AMWater Actify is a machine that produces both alkaline and acidic water from tap water. It addresses the imbalance of every day physical signs at the energetic level to "reorganize" your bio-energetic field. In the state of homeostasis (complete balance), your innate restorative and balancing processes and optimal wellness can be restored.

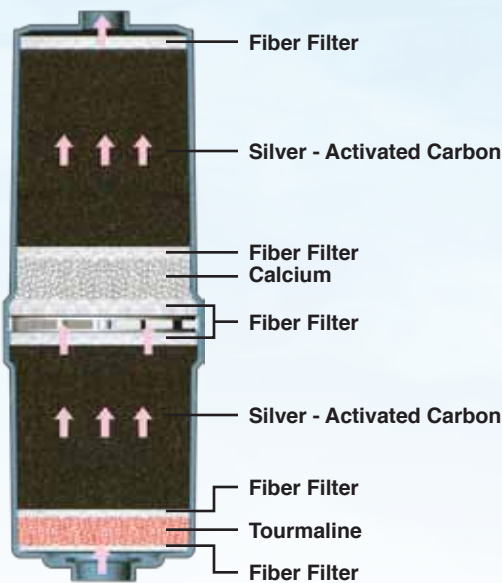

Electrolysis Device

- Electrolysis Method: Continuous electrolysis
- Electrolysis Strength: 1,2,3,4 Level
- Ionized Water Output Range: Max 3 Liters/ minute (alkaline+acidic water)
- Cleaning Device: Polarity auto-alternating system
- Electrode Materials: Platinum & Titanium

Water Purifying Device

- Filter Replacement: Easy replaceable cartridge
- Filter Life (Duration): Approx 5~6 months basis 20 Liters/ day
- Filter Life Indicator: LCS Indication
- Filter Composition: Silver-Activated carbon, Fiber filter, Calcium, Tourmaline
- Water Supply: Direct connection to a tap; or a hard lined to plumbing

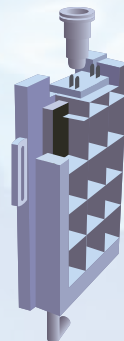

Carbon Filter Composition

Benefits

- Balance the pH level in the body
- Improve the taste and clarity of water
- Helps remove remnants of harmful elements
- Supports detoxification

Properties of Electrolytic Cell (Plate)

There are 5 plates located inside the AMWater Actify. The purpose of these plates are to ionize the water. It produces alkaline ionized water with an excess amount of OH⁻ ions at one end and acidic ionized water with an excess amount of H⁺ ions at the other end. The alkaline ionized water is generated with all the benefits of alkaline minerals so that it is drinkable. These alkaline properties neutralize acids and supplies the cells and tissues with alkaline minerals in ionized micro-cluster bio-active forms.

Technical Data Sheet

Alkaline Water

- Rotate the inflow control valve clockwise to have water flow into the unit, then push the Alkaline Water Button
- The unit will beep and an Alkaline pH level number icon will appear in the LCD window

Purified Water

- Rotate the inflow control valve clockwise to have water flow into the unit, then push the Purified Water Button
- The unit will beep and a Purified pH level number icon will appear in the LCD window

Acidic Water

- Rotate the inflow control valve clockwise to have water flow into the unit, then push the Acidic Water Button.
- The unit will beep and an Acidic pH level number icon will appear in the LCD window

To change a pH strength level, push the desired water (Alkaline, Purified or Acidic) button repeatedly until your desired pH level number appears. The unit will beep and the pH level number icon will appear in the LCD Window.

Additional Calcium Supplement

- Adding minerals to the water will make stronger ionized water
- This feature will allow a small amount of calcium to be dissolved along with the purified water as it flows from the filter
- Ionized calcium is easily absorbed into the body
- Any water soluble mineral can be used
- Each calcium vial last about 4 weeks for normal usage
- Discard any unused calcium when you replace the new vial

Results may vary from person to person.

Suggested Use

Drink 1-2 cups of alkaline ionized water on an empty stomach every morning and 1-2 cups before bedtime to benefit the body. Drink 2-3 cups at the pH level of 8.0-9.0 everyday upon awakening and increase the quantity with higher pH strength as your body gets accustomed to it.

Uses for Alkaline or Acidic Water

The eOmega AMWater Actify Water Treatment System has a one touch automatic ionization start.

Alkaline 10.0

- Do not drink at this level, unless experienced with 9.5, 9.0 and 8.5
- Wash vegetables
- Boiling foods

Alkaline 9.5

- Drinkable after experienced with 9.0 and 8.5
- For brewing barley tea and oolong tea
- Can make teas softer in 1/2 the time than using tap water

Alkaline 9.0

- Drinkable after experienced with 8.5
- To cook rice
- To make teas

Alkaline 8.5

- Drinkable for beginners

Purified 7.0

- For drinking
- For taking medicine and mixing with powdered baby milk

Acidic Water 6.5 - 5.5

- Do not drink
- For skin care and face-washing.
- For cleaning after face-washing, bathing and shaving.
- For washing kitchenware and tableware.
- For use on some house plants and flowers.
